This product, catalogue no. 89-637-X no. 002 is available for free in alternate format. To obtain a single issue, visit our website at www.statcan.gc.ca and select "Publications."

Standards of service to the public

Statistics Canada is committed to serving its clients in a prompt, reliable and courteous manner. To this end, the Agency has developed standards of service which its employees observe in serving its clients. To obtain a copy of these service standards, please contact Statistics Canada toll free at 1-800-263-1136. The service standards are also published on www.statcan.gc.ca "About us" > "Providing services to Canadians."

Note of appreciation

Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Symbols

The following standard symbols are used in Statistics Canada publications:

.	not available for any reference period
..	not available for a specific reference period
...	not applicable
0	true zero or a value rounded to zero
0^s	value rounded to 0 (zero) where there is a meaningful distinction between true zero and the value that was rounded
^{p}	preliminary
^{r}	revised
x	suppressed to meet the confidentiality requirements of the *Statistics Act*
^{E}	use with caution
F	too unreliable to be published

About the Aboriginal Peoples Survey

The Aboriginal Peoples Survey is a national survey of Aboriginal peoples (First Nations peoples living off-reserve, Métis and Inuit) living in urban, rural and northern locations throughout Canada. The survey provides valuable data on the social and economic conditions of Aboriginal children and youth (6 to 14 years) and Aboriginal people (15 years and over).

The Aboriginal Peoples Survey was developed and implemented in partnership with the following National Aboriginal Organizations:

- Congress of Aboriginal Peoples (CAP);
- Inuit Tapiriit Kanatami (ITK);
- Métis National Council (MNC);
- National Association of Friendship Centres (NAFC);
- Native Women's Association of Canada (NWAC).

The survey was funded by a Consortium of federal departments including Indian and Northern Affairs Canada (INAC), Human Resources and Social Development Canada (HRSDC), Health Canada (HC), Canada Mortgage and Housing Corporation (CMHC) and Canadian Heritage (CH).

The survey includes a broad range of topics such as Aboriginal identity and ancestry, education, language, labour activity, income, health, communication technology, mobility, housing and family background.
Aboriginal organizations, governments at all levels, service providers and researchers will be able to use information from the APS to:

Inform decision-making (Program/Policy planning and development);

Support academic research (Educators and researchers).
The Aboriginal Peoples Survey (APS) is a post-censal survey, that is, the sample was selected from people living in private households whose response on their 2006 Census questionnaire indicated that they:
had Aboriginal ancestors and/or;
identified as North American Indian and/or Métis and/or Inuit, and/or;
had treaty or registered Indian status and/or;
had Indian Band membership.

A series of supporting data tables accompanies the First Nations analytical article from the 2006 Aboriginal Peoples Survey (APS). These supporting data tables provide data at the provincial/regional level for off-reserve North American Indian children aged 6 to 14 for major themes covered in the analytical article: school achievement; parental satisfaction toward school practices; getting along with teachers; learning disability; frequency of reading books; and frequency of playing sports.

More detailed information about the survey is available in the APS 2006 Concepts and Methods Guide (catalogue number 89-637-X 2008003).

Aboriginal people living in Indian settlements and reserves in the 10 provinces were not included in the 2006 Aboriginal Peoples Survey. In the three territories, all First Nations people were included in the target population.
People identified as 'North American Indian'; however in other analytical publications from the Aboriginal Peoples Survey (APS) the term 'First Nations People' is also used.

Percents may not add up to 100% because responses of 'don't know', 'refusal' and 'not stated' were included in the calculation of all estimates and rounding.

Whenever a subsequent question is asked for a subgroup defined by a previous filter question, the following rule is used concerning the "not stated". By using a top down approach in processing, all "not stated" from the filter question are included in the denominator of the subsequent question. Different percentages to the categories of the subsequent question would be obtained if these 'not stated" were not included in the denominator.
"Not stated' includes 'not stated', 'don't know' and 'refusal'.
'Atlantic Provinces' includes Newfoundland and Labrador, Prince Edward Island, Nova Scotia and New Brunswick combined. 'Territories' includes the Yukon, Northwest Territories and Nunavut combined.

Notes:
Parents or guardians' perceptions were measured by the following question: "Based on your knowledge of ___ 's school work, including report cards, overall, how well is ___ doing at school this year?"
Percentages may not add up to 100% due to rounding.
Source: Statistics Canada, Aboriginal Peoples Survey, 2006.
